

Presentation and workshop

Towards water sensitive design without maintenance requirements for asset owners

Venue: Glenunga Hub – Margaret Bond Room 1
89 L'Estrange Street
Glenunga

Date: Tuesday, 14 March 2017

Registration: 1:30pm

Time: 2:00-4:30pm

This presentation and workshop session will cover zero additional maintenance water sensitive urban design (ZAM-WSUD) philosophy, an explanation of existing installations, photographs, construction methodologies, laboratory testing results and practical learnings from field trials. The workshop will provide a practical example showing how ZAM-WSUD shared resources can be utilised to allow new installations to be easily incorporated into capital works projects, including site selection, design considerations and development of contractual documentation.

Presenter

[Simon Brink](#), Projects Engineer, Manningham City Council, Victoria

Program

Time	Topic	Who
1.30 pm	<i>Registration</i>	
2.00pm	Welcome and introductions	Mellissa Bradley Water Sensitive SA
2.05pm	Introduction to ZAM-WSUD – presentation including lots of photos, strategic context, philosophy, research, prototypes, practical installations, design considerations, construction methodologies, etc.	Simon Brink
3.00pm	Design example – site selection, utilising the ZAM-WSUD handbook as a construction document (i.e. standard drawings and tech specs)	Simon Brink
4.10 pm	Opportunities for SA	Mellissa Bradley
4.15pm	<i>Afternoon tea & networking</i>	
4.45 pm	<i>Close</i>
